Puget Sound Blood Center  
Professor of Medicine, Division of Hematology  
University of Washington*

# “Understanding Hemostatic Complications of Pregnancy”

Pregnancy presents both hemorrhagic and thrombotic challenges and provides a natural model through which to study hormonal effects on hemostasis. Quantitative, as well as qualitative, changes in hemostatic proteins impact these risks. Improving our understanding of hemostatic mechanisms and clinical risk factors will lead to improved outcomes in pregnancy.

This Seminar is sponsored by:

Bayer HealthCare

Host: Dr. Ed Conway, CBR Director, Professor of Medicine, UBC

a place of mind

Refreshments will be served 10 minutes before the seminar  
Seminar information: 604 822 7407
