

CBR Research Day

August 15th, 2013

LSC West Atrium, 12-7PM

Keynote Speaker: Dr. Brian B. Hoffman

Professor of Medicine, Harvard University

"The Discovery of Adrenaline: Lessons from the Past"

Challenging dogma and conceptual frameworks.... This is what was required to make the seminal discovery of adrenaline and to describe its function and relevance. Was it a eureka discovery? Like most major discoveries, it resulted from many investigators pursuing a problem to deeper and deeper levels of understanding. And were these scientists child prodigies? Most not! Following on his recently published and popular book, Dr. Hoffman will entertain and inform He'll even explain how adrenaline, clotting, communism, and the US Supreme Court are all connected!

This spectacular event includes short talks and poster presentations from our 2013 CBR Summer Students research as well as posters from our CBR members. There will be a lunch, dinner BBQ/social and **special awards** for our Summer Students!

Schedule
