

CBR Graduate Student Awards

\$5,000 (non-renewable)

The Graduate Student Award is available to MSc or PhD students based on academic achievements, scientific merit of the proposed project, and the potential benefits applicants will gain from the experience.

CBR strongly encourages applications from students who are co-supervised by a CBR basic research-scientist and a CBR clinician-scientist. The collaborative projects will be given a priority consideration.

Conditions:

The students must be under the supervision of at least one CBR PI and cannot be holding another salary award. Only one award can be given to each student, and only one application per PI or per collaboration can be submitted. Students will be provided with the award for a maximum of 12 months starting in September each year. Students/PIs must recognize the CBR on all publications/presentations/posters.

Application procedure:

- Cover page: Name and contact information of PI and student & title of project
- 2-page proposal of project, including rationale, goals/objectives, experimental methods, expected outcomes, time frame (Times 12 font, 2 cm margins)
- 1-page personal statement by the student describing their expertise, experience and motivation that make them the best candidate for undertaking the project (Times 12 font, 2 cm margins).
- C.V. of student (not more than 5 pages). Include current and applied-for funding.
- Send complete application as a single pdf to: **Anna.Sinova@ubc.ca**
- Application Deadline: **June 30**
- Notification: **July 31**
- Start Date: September 7 (no deferrals)
- Administration of the monies will be handled through the CBR.

Graduate Award Program (GAP):

Successful applicants (students) will be required to present their progress to other awardees in a seminar program, take part in a journal club, and present at CBR events: CBR Research Day, Norman Bethune and Earl Davie Symposia. Each year students can also choose optional add-ons, such as a mentorship program. A 1 page final report will be required from the student at the end of the award period.

Questions: contact anna.sinova@ubc.ca for more details and information.
