LSC 3 - Life Sciences Centre

2350 Health Sciences Mall

12-1pm

Dr. Josie Visentini

Medical Advisor for Hematology at Pfizer Canada

“Highlights of a Scientific Career in the Pharmaceutical Industry”

During this presentation, Dr. Visentini will share the highlights of her scientific career in the pharmaceutical industry for over 20 years. Her pharmaceutical experience includes Global Research Laboratory and Medical Affairs roles in a variety of therapeutic areas. Topics covered in this presentation will include descriptions of drug discovery and drug development processes as well as post-marketing medical brand support in a rapidly changing healthcare system. Furthermore, she will present some of her more recent projects as the Medical Advisor for the Hemophilia portfolio at Pfizer. These projects will include (1) evolution of a basic science model to better understand emerging clinical data, (2) utilization of a new tool to enhance clinical management of hemophilia patients and (3) stimulation of new research collaborations through partnership with the hemophilia community. Finally, Dr. Visentini will share her observations on the competencies required for a successful scientific career in the pharmaceutical industry.
