

**The Centre for Blood Research  
Cellular and Physiological Sciences**

**Microbiology and Immunology  
Biochemistry and Molecular Biology**

**INVITE YOU TO A SEMINAR ON**

**Wednesday July 20 | LSC 3 | 12pm**

**Live Online Seminar Viewing:**

<http://tinyurl.com/cbrseminaronline>

**“Dissecting signaling specificity: why promiscuity is not what it seems”**

**Dr. Jim Woodgett**

Professor and Director of Research of the-Tanenbaum  
Research Institute Mount Sinai Hospital, Toronto

---

Dr. Woodgett's group is studying the molecular mechanisms by which the Wnt and PI3K pathways are dysregulated in human cancers such as breast and colon cancer. His laboratory is also studying the roles of signaling pathways in type-2 diabetes and stem cell fate determination.

---

**Join us after at LSC 3 from 1:30pm to 2:30pm:**

**Townhall meeting and panel discussion on health research funding by CIHR:  
“What’s wrong and how do we fix it?”**
