

CBR Summer Seminar Series

Wednesday, June 20 | LSC 1510 | 12pm

Dr. Christian Kastrup

Associate Professor, Michael Smith Laboratories and Department of Biochemistry and Molecular Biology
General Topic: "Biomaterials and Mechanisms to Understand and Control Hemorrhage"

Karen Chan , PhD Candidate

Massimo Cau , PhD Candidate

Lih Jiin Juang , PhD Candidate

"Adhesive Mechanisms of Blood Clots"

"Improving the Efficacy of Hemostatics by Increasing their Transport in Wounds"

"FXII Contributes to Hemostasis when Triggered by Soil in Wounds "
