

Wednesday, March 3, 2021
11:00am - 12:00pm PST

Dr. Leslie Skeith

Assistant Professor, University of Calgary
Principal Investigator for the partumtrial.ca

“Complement activation and obstetric antiphospholipid syndrome”

Dr. Leslie Skeith will review the diagnosis and current management of obstetric antiphospholipid syndrome (APS), and present evidence on the role of complement activation in patients with APS. Dr. Skeith will present future research directions including evaluating complement activation in a prospective cohort of pregnant patients with APS.
