## Dr. Moritz Stolla

**Director**, Platelet Transfusion Research

**Assistant Member**, Bloodworks NW Research Institute

**Assistant Professor**, Div. of Hematology, Dept. of Medicine, University of Washington School of Medicine

**Associate Medical Director**, Swedish Medical Center, Blood Transfusion Service

## “Cold-stored platelets - Back to the Future?”

I will give a brief introduction on the historical data of cold-stored platelets. I will then focus on my group’s data on cold-stored platelets: their recovery and survival in vivo and their in vivo and post transfusion function. Finally, I will give an outlook about currently ongoing and future studies on cold-stored platelets in different patient populations.
