

# Reconstructive Transplantation

## A slowly developing paradigm

*The development of face, hand, genitourinary vascularized composite allotransplantation.*

**Dicken S. C. Ko**, BSc, MD, FRCSC, FACS  
*Professor of Surgery, Warren Alpert Medical School  
of Brown University*

Dr. Ko was instrumental in identifying, coordinating, and facilitating new developments for areas of unmet needs in urology. Dr. Ko is a pioneering surgeon who is a co-leader of the team that performed the first successful genitourinary vascularized composite allograft (penile) transplant in the USA. His groundbreaking innovation has been featured in the New York Times, Time Magazine, CNN, and over many media outlets worldwide.

A peek into the Dr. Ko's work in TIME Magazine  
[The New Transplant Revolution](#)

This seminar will take place in a **hybrid model** on  
**Wednesday, December 1<sup>st</sup>, 2021 at 4:00PM**

In-person presentation will be held in LSC 1003 LT3

Remote attendance can be accessed over zoom
